

Deo Ajay J | Frontend Developer

deoajay1210@gmail.com | +91-8825821924 | Madurai ,TamilNadu, India.

Professional Summary

Frontend Developer with around **2.7 years** of experience building scalable, responsive, and user-friendly web applications using React.js , Angular and JavaScript. I specialize in creating modern, intuitive UIs, developing component-based architectures , and delivering projects in Agile environments. I've worked on diverse projects including e-commerce platforms, government portals, admin dashboards, funding platforms, and automation tools.

Core Skills

- **Frontend** : HTML5, CSS3, JavaScript (ES6+), TypeScript, Tailwind Css, Bootstrap.
 - **Frameworks/Libraries** : React.js, Angular, Redux, Context API.
 - **API Integration** : REST APIs, Axios, Fetch.
 - **Version Control** : Git,GitHub.
 - **BuildTools** : Webpack,Vite,NPM.
 - **Testing & Debugging** : ChromeDevTools, React Testing Library.
 - **DesignTools** : Figma,Photoshop(basic).
 - **Project Management**: Agile, Scrum.
 - **Software Practices**: SDLC, CI/CD Pipelines (Vercel, Netlify, AWS)
-

Education

2022

MCA. – K.L.N College of Engineering, Madurai.

CGPA: 8.9

2020

BCA / S.Vellaichamy Nadar College, Madurai.

Percentage: 74.4

Professional Experience

Amizhth Techno Solution | Madurai

06/2023 – 07/2025

- Delivered scalable UIs using **React.js, Angular, Redux, JavaScript** and **TypeScript**.
- Collaborated with cross-functional teams to integrate frontend with REST APIs.
- Focused on performance optimization, reusability, and accessibility.

ARM Info Tech | Madurai

01/2023 - 05/2023

- Developed and maintained design systems for web applications, ensuring consistency and usability across multiple projects
 - Collaborated with developers to translate design mockups into functional web pages, using HTML, CSS, and JavaScript
-

Key Projects

TANFUND

- The Tanfund provides financial support to startups, entrepreneurs, and research institutions to foster technological innovation and research
- It aims to drive economic growth by funding high-potential projects that develop innovative solutions and advance technology.
- **Tech Stack** : React, Context API, JavaScript and Material UI.

Startup TN

- Startup TN supports startups and emerging businesses in Tamil Nadu by providing end-to-end assistance.
- The program builds strong infrastructure to promote innovation, growth, and sustainability for the state's startup ecosystem.
- **Tech Stack** : React, Context API, JavaScript and Material UI.

StartupTN-Catalyst

- Tamil Nadu has built a thriving start-up ecosystem by supporting Incubators which has helped create a steady stream for new innovative ideas and startups.
- These incubators provide a vital starting point for entrepreneurs to learn about various aspects of startups and also help them in taking the first steps towards creating ventures
- **Tech Stack** : Angular, Context API, JavaScript and Material UI.

Chief Minister Accident Relief Fund

- The CMARF Management System simplifies the process of applying for and distributing financial aid to individuals affected by accidents.
- It offers an efficient, transparent, and user-friendly platform for managing relief applications and fund disbursements.
- **Tech Stack** : React.js, JavaScript, Redux, Material UI.

THALAMZ

- We can build static, SEO-friendly websites with AI integration, support for multiple image and video uploads, and sub domains — similar to a WordPress model.
- The platform, originally built in Angular, has been migrated to Next.js for better performance and scalability.
- **Tech Stack** : Next.js, TypeScript, Redux, and Tailwind CSS.

Regards,
Deo Ajay J
